

# Kirill Shevtsov

## Front-End Developer

## Personal Info

- Kharkiv, Ukraine
- [kirwork.em@gmail.com](mailto:kirwork.em@gmail.com)
- [+38 \(068\) 447 90 24](tel:+380684479024)
- [LinkedIn](#)
- [GitHub](#)
- [Telegram](#)
- [Personal portfolio site](#)

## Technical skills

- HTML
- CSS/Sass
- JavaScript (ES5, ES6)
- React
- Redux
- SVG
- GIT
- NodeJs/NPM
- Webpack
- Linux Command line
- Photoshop/Illustrator

## Languages

- English - intermediate
- Russian - native
- Ukrainian - native

I came to web development about three years ago. During this time, I studied by myself basic Web technologies - HTML, CSS, JavaScript. Also, I completed several freelance projects.

Currently, I also continue to engage in self-education - I study various approaches to web development and try them in practice. I'm writing my own projects. I'm interested in everything related to UX / UI, performance, accessibility, design.

## Experience

### 2017 - present **Freelancer. Front-end developer**

#### What am I doing:

- I make HTML and CSS adaptively and semantically to make the site look pretty;
- I write interfaces on React;
- I use Redux as the single source of truth;
- Sometimes I can and in design (if it's not available or it's necessary to add something quickly);
- I write client-side (and more recently, a little server-side) JavaScript so that the forms were validated and sent and the data from third-party APIs were received;
- I try not to use third-party libraries without urgent need. After all, we want to get the minimum bundle size, isn't it?
- If you still can't do without a library, then, without false modesty, I can find the right one for a specific task and, after reading its documentation, start using it. One recent example is the Nightmare.js library. Its use in a short time helped solve customer problems;
- I can "fasten" something necessary and useful to an existing project. I can also dig deeper into the code for error correction;
- I estimate the deadlines for fulfilling tasks and observe them;
- I use ESLinter according to Airbnb's precepts (yes, I read their March theses on GitHub);

### 2001 - 2016 **Sales manager (The job which not related to vacancy)**

#### What I was doing:

- Supplies of industrial electrical equipment
- I searched (and quite successfully) for new customers and suppliers and negotiated with them. Also, I prepared documentation and participated in tenders.

## Education

### 1999 - 2003 **National Technical University "Kharkiv Polytechnic Institute"**

- Specialty - economics and marketing. Incomplete higher education.

## Courses

### 2016 - 2018 **Codecademy**

- Learn JavaScript.
- Learn ReactJS.
- Learn Responsive Design.
- Make a Website.

#### UDACITY

- Responsive Web Design Fundamentals.

#### Hexlet.io

- Basics of programming.
- JS: preparation for work.
- Introduction to web development.

#### freeCodeCamp

- Responsive Web Design.
- Javascript Algorithms And Data Structures.
- JSON APIs and Ajax.
- Front End Libraries.

#### HTML Academy
